

## Would you like to become a telephone operator for a while?

For this activity, at least three people are required:

1. Telephone operator
2. Person calling from a transmitter telephone
3. Person answering from a receiving telephone

Spread throughout the exhibition, there are four telephones connected by this switchboard: **Telephone A**, **Telephone B**, **Telephone C** and **Telephone D**.

Would you like to transfer a call from one to another?

### How to use the switchboard?

Example of a call from telephone A to telephone B.

#### Telephone a

1. Dial 09 to connect with the switchboard and request a call to **Telephone B**.

#### Operator

2. A pilot light will illuminate on the switchboard
3. Put on the headset
4. Insert the RED plug into the hole of the illuminated light
5. Move the YELLOW key forward to talk to **Telephone A**.
6. Insert the GREEN pin into the hole on **Telephone B**.
7. Move the YELLOW key backwards and turn the BLUE crank clockwise. This will activate the ringing tone of **Telephone B**.

#### Telephone B

8. Pick up **Telephone B** to speak to **Telephone A**.

#### Operator

9. Ask **Telephone B** if they want to speak to **Telephone A**.
10. Push the YELLOW key to the center position so that **Telephone A** and **Telephone B** can now speak.
